## For Parents: Health Help at School

---

Every healthy children who see a physician regularly may need emergency care or help with medications during the school day. Here are five questions to help you learn what help is available:

- What health services are provided in the school building?
- Who provides this care?
- When are these services available?
- What students are eligible to receive these services?
- How (and when) can I contact the person providing counseling services?
