For Parents: School-Wide Emergencies

Find out how your school has prepared for the unexpected by asking these questions:

- What emergency situations have been identified that might threaten the school or its surrounding community? What is the response for each threat?
- Have school staff and students received training or participated in drills using emergency procedures?
- How do new teachers or staff learn and practice emergency procedures?
- Does your student remember the training provided and have a sense of what he or she is supposed to do?
